

CARING FOR YOUR LAMINATE FLOOR

Aqua Shield

1000ml

For refreshing of prefinished floors, increases durability and protects against penetrating moisture from above.

1000ml (approx 35m²)

Intensive Active Cleaner

500ml

For regular cleaning of Laminate floors, Synthetic/PVC, Rubber and Tiles. (approx 40 applications)

FIRST CARE

As a low maintenance product, Laminate flooring does not require any special initial treatment.

REGULAR CARE

Dry cleaning:

It is usually sufficient to clean your Laminate Floor dry using a dust mop, soft broom or vacuum cleaner.

Damp cleaning:

We recommend that the floors be mopped regularly with clean & green® active depending on how dirty the floor is and wear and tear.

Add ½ dosage cap of clean & green® active to 5 litres (1.3 gal.) of water. Then wipe the surface with a well-wrung, slightly damp cloth. Do not clean the floor surface too damp, always avoid letting water stand on the surface. By polishing the floor with a cloth afterwards you can optimize the shine of your floor's surface. Steam cleaning machines are not suitable for use on laminate floors.

INTENSIVE CARE

Refreshing:

To optically refresh the floor and improve durability, we recommend that you use Clean & Green AquaShield. Start by thoroughly cleaning the floor (dust-free). We recommend Clean & Green Active for this job. Clean & Green AquaShield is applied on diluted with a rectangular/square cotton cover mop. Evenly apply the AquaShield in overlapping lines. Wait about two hours before subjecting the floor to traffic and load. The application of Clean & Green AquaShield can lead to changes in the gloss level.

BASIC PROTECTION

In maintaining the appearance of your Laminate Floor it is always beneficial to use protective felt pads under chairs and table legs and doormats in entrances (to protect your laminate floor against moisture, dirt and sand). A further recommendation is to use the polycarbonate mats.

ENTRANCE BARRIER MATTING

We recommend that good quality entrance barrier mats are used at all external entrances to the laminate flooring to collect grit and moisture from the underside of footwear. We strongly recommend that at least 2 - 3 foot falls are allowed for. Vacuum and clean the mat regularly. If you must move heavy pieces of furniture (e.g. refrigerator, sofa etc.), never slide them directly over the flooring. Instead, place a piece of carpet face down between the legs and the flooring and pull on the carpet to move the furniture.

SPILLAGES

Laminate floors have a level of water resistance; however damage can occur if spillages of liquid onto the surface are not wiped up immediately.
