

# Caring for your **UV Oil Floor**

In order to keep your flooring protected and looking well over its lifetime, please follow below guidelines. The recommended Woca care products should be used as they are compatible with the factory applied surface finish:

## UV Oil Finish

A UV Oiled finish is similar in many ways to a matt varnish as the oil is hardened under UV lights during the finishing process. Eventually the surface will wear down similar to a varnish. With a UV Oil finish it is important to use the recommended maintenance products for the flooring as it provides ongoing protection to the floor surface.

**WOCA Soap  
Natural/White  
2.5L**

**WOCA  
Wood  
Cleaner 1L**

**WOCA Maintenance  
Paste Natural / White  
400ML**

## 1: IMMEDIATELY AFTER INSTALLATION

An application of Woca Soap should be done as first treatment immediately after installation. This comes in 2.5 Litre can which covers 250-300m<sup>2</sup>. This can be applied simply using a rectangular/square cotton cover mop or a mop and bucket. If the flooring has gotten dirty during renovation a coat of maintenance paste may be required, please use Woca Wood Cleaner the day before the Maintenance paste is first applied.

N.B. Woca Wood Cleaner is a high strength intensive cleaner and is not for general/regular cleaning. It should only be used as outlined above and as per step 3 below.

## 2: ONGOING CLEANING & CARE

Ongoing regular cleaning should be carried out as needed using Woca Soap as outlined in step 1. Higher traffic areas e.g hallways, kitchen areas will require more frequent cleaning. White/Grey tone floors will require more frequent care.

## 3: RE-OILING & RESTORING YOUR FLOOR

The UV Hardened Oil finish will have a similar lifespan to a varnished/lacquered floor. When the floor needs to be re-oiled, the floor should be first washed with Woca Wood Cleaner. A buffing machine with a white pad can be used for more stubborn marks/stains.

The following day a coat of Woca Maintenance paste is then applied by buffing machine and white pad. It takes 1 week for the paste to fully harden. After 1 week, please follow Step 2 recommendations above for ongoing cleaning and care of your floor.

Please see the reverse of each Woca product for full usage instructions

**For natural oaks and darker wood floors, use **natural** finish products.**

**For white/grey tone floors, use **white** finish products.**
