

# CARE AND MAINTENANCE LACQUERED / UV LACQUERED

## Room Conditions

Timber likes pleasant room conditions similar to humans; a room temperature of 20°C and humidity of about 50%. A humidity controller may be required. All rooms, which have timber flooring, should ideally be maintained at the above.

## LACQUERED / UV LACQUERED

Prefinished floors are among the easiest floors to care for. The finish consists of resistant, UV-hardened acrylic lacquer. It is formaldehyde-free and environmentally friendly. As with all floor finishes eventually the surface will wear down and require refinishing. To prolong the lifespan of the floor it is important to use the recommended maintenance products below as it provides ongoing protection to the floor surface.

Higher traffic / heavier use areas will require more frequent use of the Master cleaner and Master care to extend the lifetime of the surface. The floor should be reviewed regularly and maintained for signs of excessive wear and appropriate action should be taken to avoid deterioration of the finish. If there are other building works taking place after installation the floor should be covered to protect the finish. Please see the reverse of each Woca product for full usage instructions. There are also detailed video instructions available at [www.wocadenmark.com/video](http://www.wocadenmark.com/video)

### CLEAN (REGULARLY)

#### Master Cleaner

Avg. Coverage: 400m<sup>2</sup>/L

Effectively removes everyday dirt and grime as well as making the surface stronger and more resistant to liquid spillages. As the cleaner leaves a thin smooth film layer, the floor will start to withstand everyday dirt.

### REJUVENATE (AS REQUIRED)

#### Intensive wood cleaner

Avg. Coverage: 200-300m<sup>2</sup>/L

This is strictly for preparing wooden floors for further treatment. Intensive wood cleaner is efficient at removing stains caused by dirt or grease whilst also helping to open the wood to receive further treatments.

#### Master Care

Avg. Coverage: 60m<sup>2</sup>/L

Helps to reduce the visibility of small scratches, increases the resistance of the surface and provides effective protection against wear. This extends the lifetime of the surface. The product can be used as required because it does not build up a thick coating.

We recommend using Master Cleaner for regular cleaning of your lacquered floor. Woca Master Care is to be used when your floor is in need of refresher treatment.

## Protecting your floor

To preserve quality and beauty of your floor the following guidelines should be followed.

- Use protective pads and castor cups under chairs and furniture legs. Use good quality polycarbonate mats under wheeled office chairs.
- We recommend that good quality entrance barrier mats are used at all external entrances to the hardwood flooring to collect grit and moisture from the underside of footwear.
- Never use a rubber mat, with Styrofoam or plastic backing.
- For moving heavy furniture place a piece of carpet face down between the legs and the flooring and pull on the carpet to move the furniture.
- We would advise that during installation / other building works that the timber floor is covered with a heavy duty breathable floor protection roll / sheets to protect the finish.
- Do not apply adhesive / decorators tape directly to the floor finish.
