HERRINGBONE

Classic Design for Modern Living

The classic Herringbone design can be traced back to the Romans who used the design in the construction of roads to add strength. The pattern became known as "Herring - Bone" as it resembles the outline of a fish skeleton. The Renaissance periods between the 14th and 17th centuries saw the design being used in many aspects of architectural design including flooring.

Traditional real wood Herringbone has long been a desirable choice to add a touch of class to any room or entrance hallway. Laminate manufacturing expertise has now been developed to bring you a high quality affordable alternative.
